

WATER REPORT – June 21, 2022

Rain received over the weekend was sufficient to completely fill the Jackson Lake storage rights. The 1917-priority Henrys Lake and 1921-priority American Falls storage rights are continuing to accrue additional storage. The Henrys Lake storage right is projected to accrue a few hundred acre-feet each day over the next few days. It is currently 15,000 acre-feet short of accruing 100% to its storage volume. The American Falls Reservoir storage right is projected to accrue a few thousand acre-feet each day over the next couple days as it is currently 143,000 acre-feet short of accruing 100% to its storage volume.

Fortunately, the peak runoff has been extended from the cooler than average temperatures with additional rain and snow received in the high country over the weekend. This has allowed continued accrual into the Henrys Lake and American Falls storage rights longer than was anticipated a few weeks ago.

Diversions are expected to increase with the warming, dry weather forecasted for this week. Natural flow is also expected to decrease with the drying, warming weather. The 1921 priority is expected to be cut towards the end of this week if diversions continue to increase and additional precipitation is not received. Projected priorities are updated each weekday on the www.waterdistrict1.com website.

CALENDAR

A Committee of Nine Special Meeting has been called for 1:30 PM today to discuss or approve rental request(s) exceeding the 100 acre-feet limitation for this year's Small Common Pool supply. The conference call telephone number for the meeting is 1-720-279-0026 with guest code 826696#.
