

WATER REPORT – September 12, 2023

The 1898-04-15 priority above Blackfoot was partially filled for one day last week following the Labor Day Weekend rains. Natural flow and priority deliveries above Blackfoot have been slowly receding since that time as dry, warm weather has returned following last week's rains.

The 1892 priorities for Falls River, Henrys Fork, and Snake River diversions above Blackfoot are currently being filled today but natural flow and priorities are projected to continue decreasing tomorrow through the end of this week.

A slight chance of widespread scattered showers is forecasted for the next couple days that could slow the rate of decreasing natural flow if those showers materialize. Near-average to slightly above-average temperatures with dry conditions are forecasted to return for the end of this week and continuing into the beginning of next week.

Current priorities projected to be filled are posted and updated each weekday in the CURRENT DATA section of the www.waterdistrict1.com webpage.

TOTAL NATURAL FLOW, TOTAL DIVERSIONS, AND PRIORITY COMPARISON
