

Water District 1 Report – July 1st, 2025

The Day of Allocation occurred on **June 17th**. Water District 1 has issued allocations, and the preliminary storage report is now available on the website (www.waterdistrict1.com).

Storage rentals, adjustments, and corresponding allocations have been fully integrated into the daily accounting. Canal managers are advised to review their respective allocations at their earliest convenience. Any questions or concerns should be directed to the Water District 1 office for clarification. Private leases and common pool rentals will continue to be updated as the season progresses.

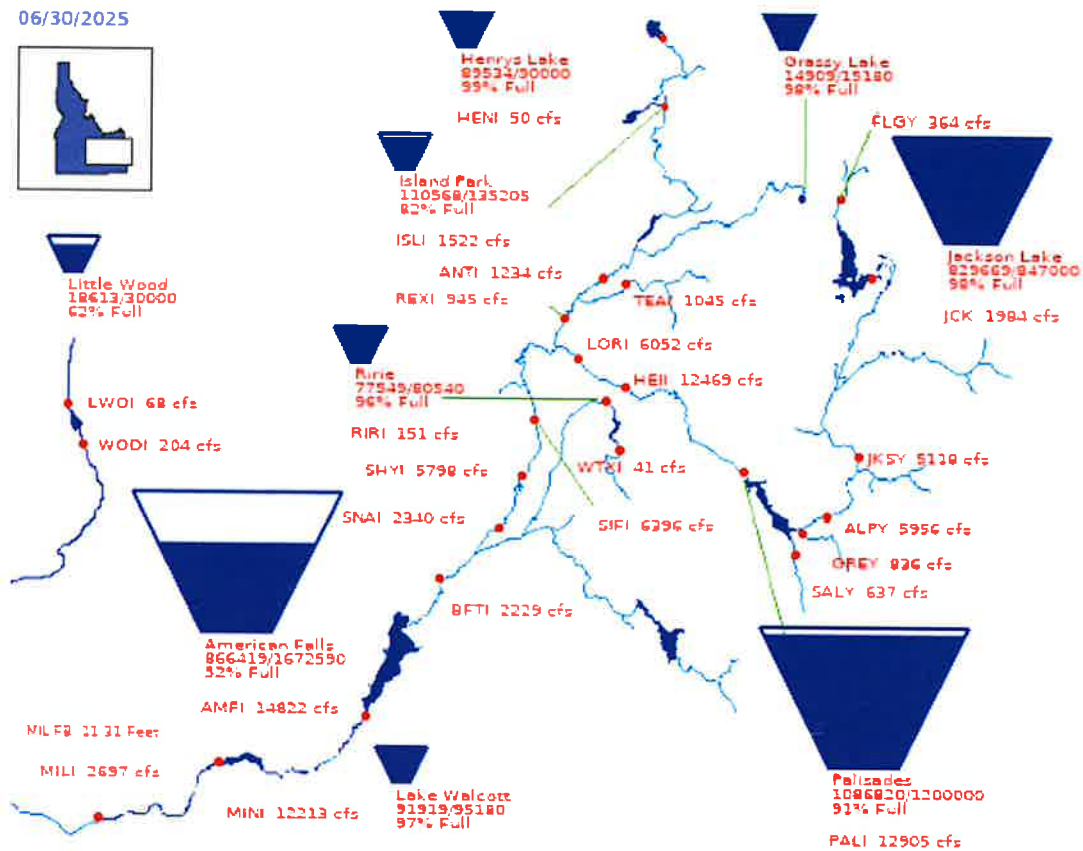

Water right priorities have continued to decline and have now split at Blackfoot with the 1895-01-09 priority projected for the Snake River above Blackfoot and the 1900-10-11 priority projected for the Snake River below Blackfoot. This condition is expected to persist for the majority of the irrigation season as natural flow supplies below Blackfoot will be limited to gains occurring downstream of Blackfoot. Above Blackfoot, priorities will continue to drop below their current level as senior irrigation rights begin to divert all available natural flow.

Flow augmentation is actively occurring below Milner at approximately 2,700 cfs and is anticipated to continue through early July. Planned flow augmentation currently includes 150,000 acre-feet of common pool rental water, along with roughly 19,000 acre-feet of uncontracted space.

Please contact the Bureau of Reclamation or Water District 1 at 208-525-7161 with any significant planned changes to diversion rates so that system operations can be optimized and full streams can be maintained to diversions.

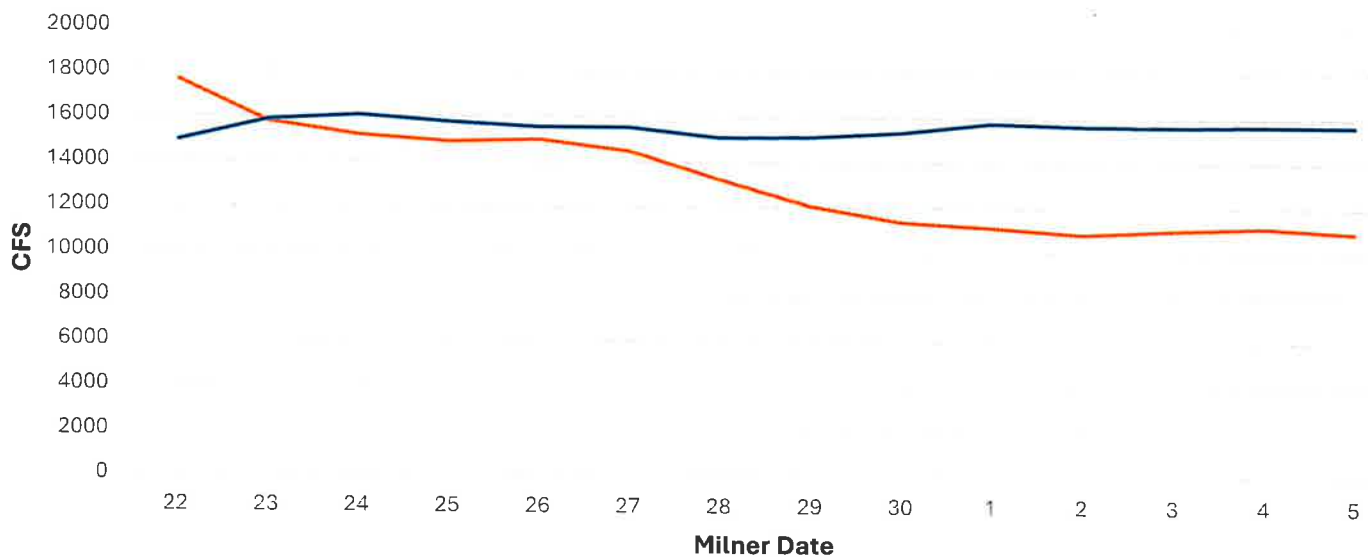

Bureau of Reclamation, Pacific Northwest Region Major Storage Reservoirs in the Upper Snake River Basin
