

Water District 1 Report – July 29th, 2026

Precipitation received over the past week has helped slow the decline in natural flow above Blackfoot. Approximately 7,500 cfs of natural flow is available today, compared with 7,600 cfs last week. Diversions have decreased significantly, from approximately 11,500 cfs to 10,500 cfs. As a result, the water-right priority has remained relatively stable near the 1890 level. Forecasts indicate a pattern change by the weekend, with hotter and drier conditions expected.

Below Blackfoot, approximately 1,600 cfs of natural flow is available, while diversions remain near 10,000 cfs.

The projected water-right priorities for tomorrow are:

Falls River:	July 12, 1890
Henry's Fork above St. Anthony:	July 12, 1890
Teton River:	June 1, 1885
Teton Lower North Fork:	October 17, 1885
Snake River above Blackfoot:	July 12, 1890
Snake River below Blackfoot:	October 11, 1900

The physical reservoir system is currently at approximately 34 percent of capacity, with 1.4 million acre-feet remaining. Storage use continues at a relatively high rate of approximately 22,000 acre-feet per day.

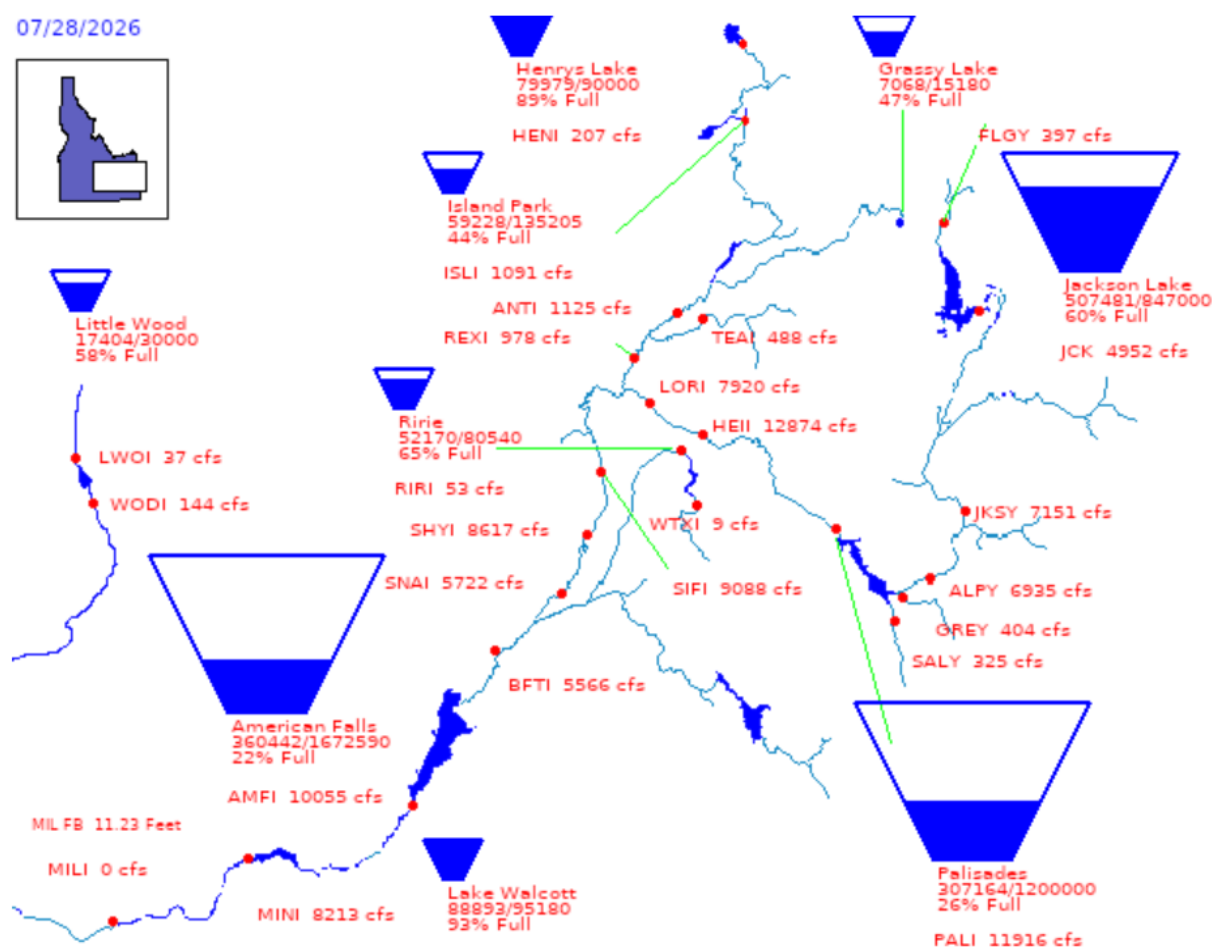

Idaho Power is scheduled to begin releasing its storage allocation below Milner on Monday, August 3, at a rate of approximately 1,570 cfs. The release is expected to continue for about two weeks.

Rental Pool Subcommittee – Wednesday, 8/5 at 1:30 pm at the IDWR Eastern Regional office and virtual. Agenda and virtual meeting information will be posted at waterdistrict1.com
