

Water District 1 Report – October 2nd, 2025

Recent cooler weather and isolated precipitation have continued to influence diversions. Natural flow has remained relatively steady, while diversions have gradually declined, allowing water right priorities to inch upward. Forecasts indicate another cold front arriving this weekend, with the potential for additional precipitation and overnight freezing conditions. We are approaching a point where priorities on the Snake River at Blackfoot may reconnect with those below Blackfoot - something that could occur within the next week.

WD1 is projecting a partial water right fill of the following priorities for tomorrow, September 25th:

1894-08-18 Henry's Fork

1894-08-18 Fall River

1894-08-18 Teton River Above Island Ward Canal

1894-08-18 Teton River Lower North Fork

1894-08-18 Snake River Above Lorenzo

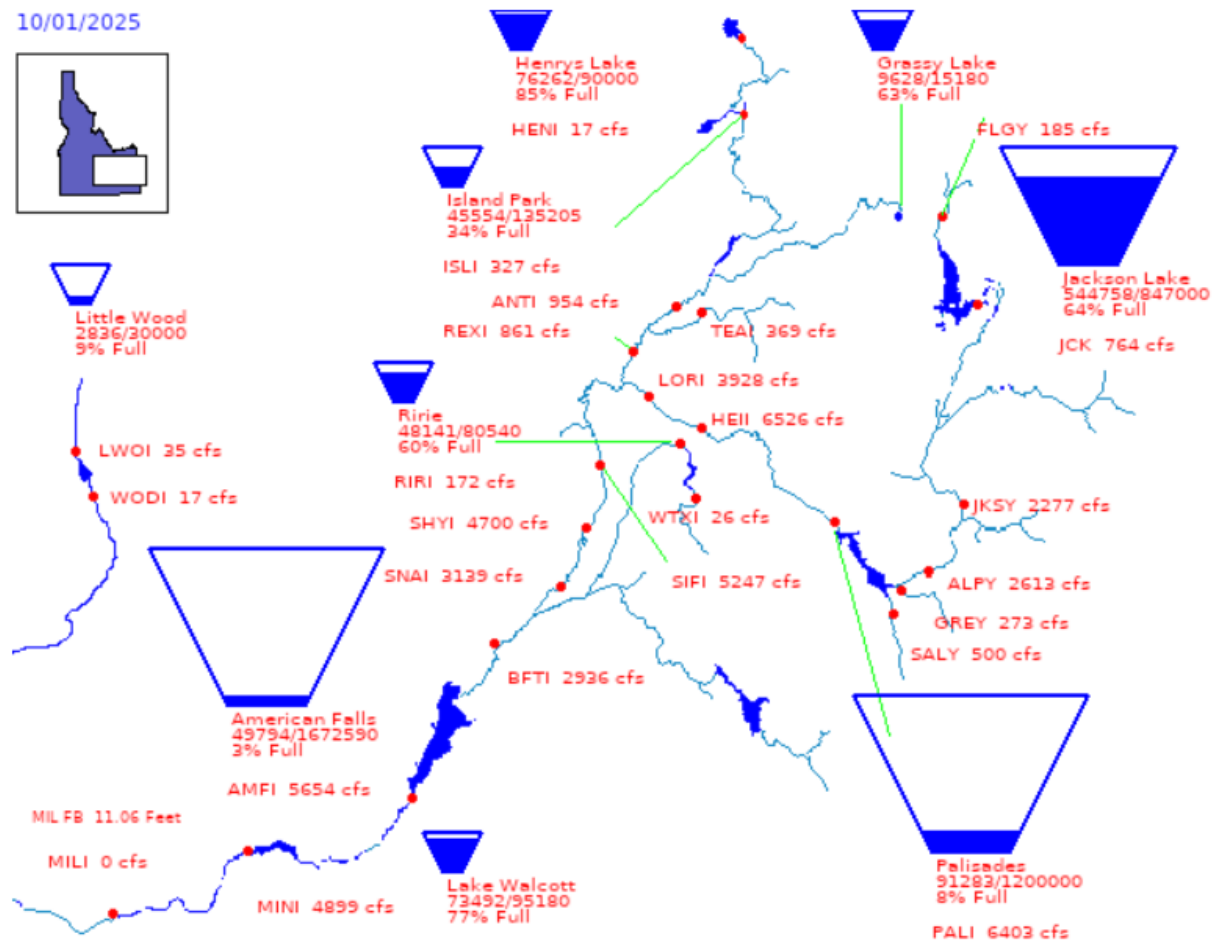

1894-08-18 Snake River Lorenzo to Blackfoot

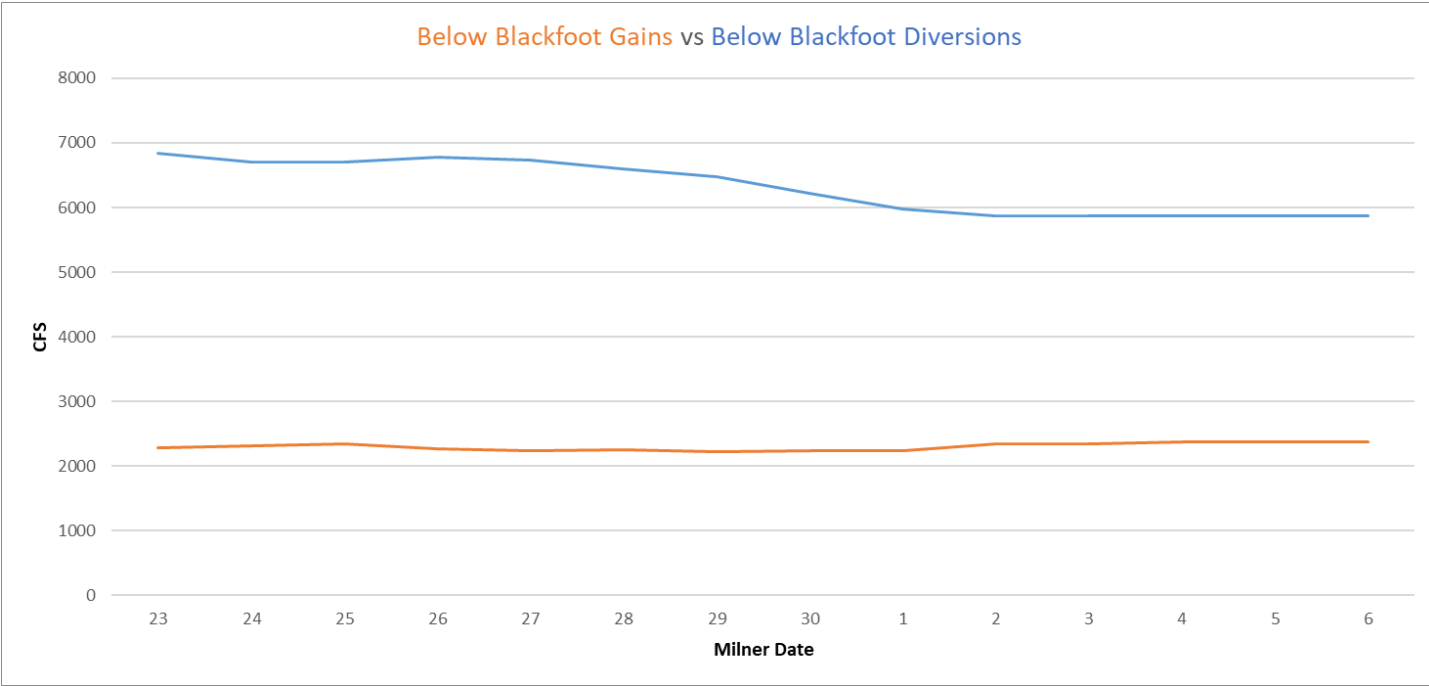

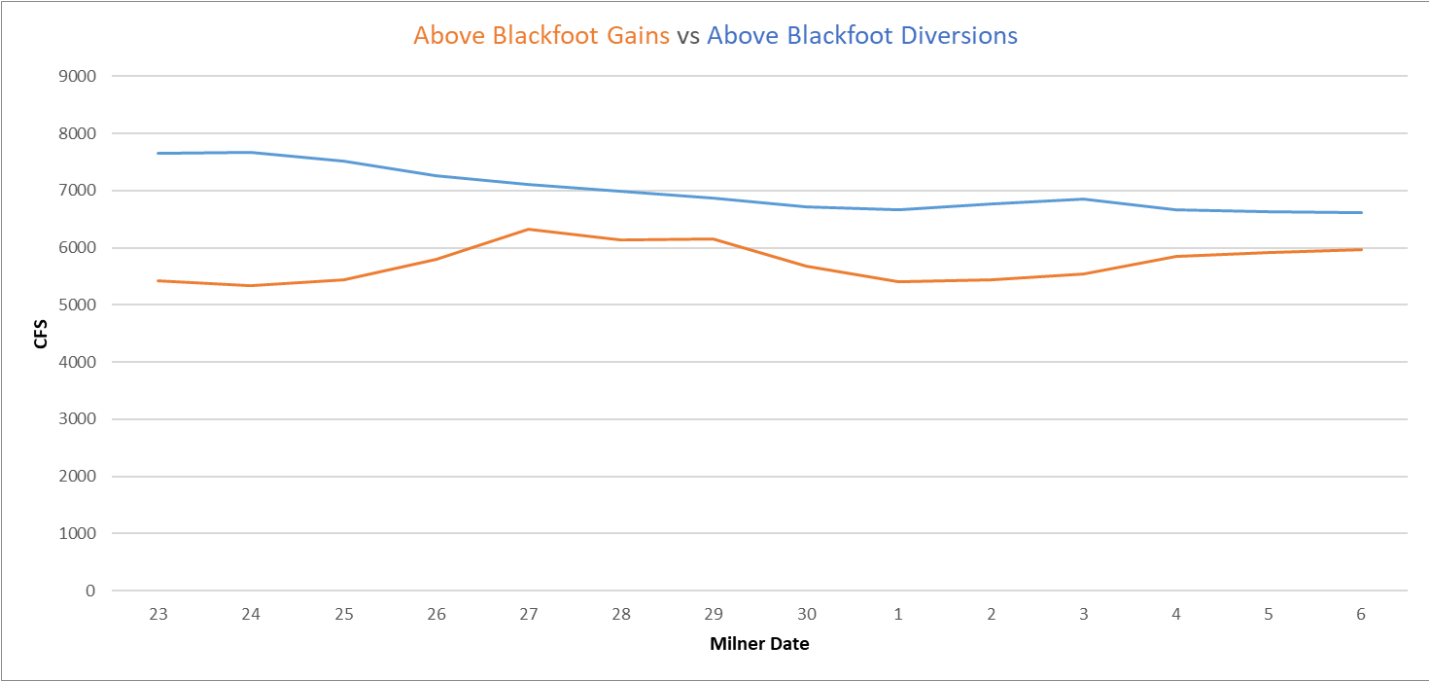

1900-10-11 Snake River below Blackfoot

Bureau of Reclamation, Pacific Northwest Region

Major Storage Reservoirs in the Upper Snake River Basin

10/01/2025
