

Water District 1 Report – October 14th, 2026

Most canals have completed the irrigation season, with a few remaining operations expected to finish water deliveries over the next week. The precipitation received over the weekend was sufficient to transition the Upper Snake River reservoir system out of drawdown and into the storage season. Storage is now accumulating under the 1906 Jackson right and the 1909 Walcott right. Recharge operations in the Lower Valley are projected to begin on October 20.

Water right priorities have reconnected at Blackfoot following the weekend storm, with projected priorities of **December 14, 1909**, across all reaches for tomorrow.

The Upper Snake River reservoir system is currently at approximately 9 percent of capacity.

October 20th – Jackson Sub-committee Meeting at 1 pm at IDWR Eastern Regional Office and virtual

October 28th – Committee of Nine Meeting at 10 AM at the Pocatello Airport and virtual

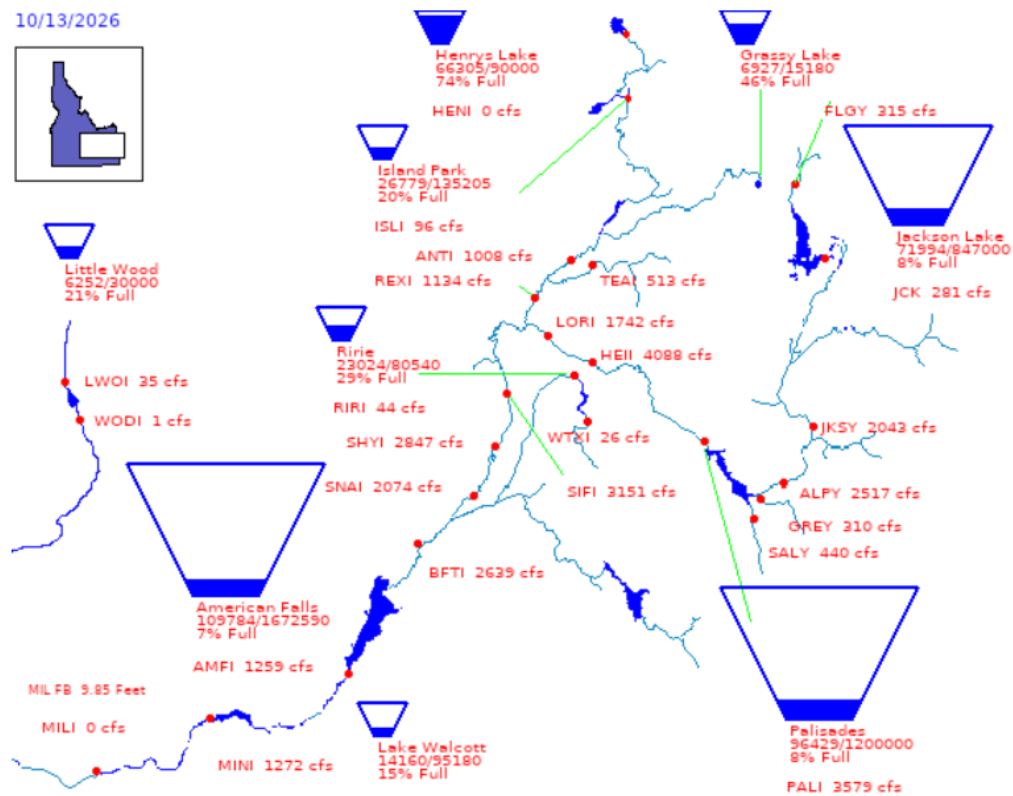

November 10th – Eastern Idaho Water Rights Coalition and the Snake River Headwaters Group will meet at the Waterfront at Snake River Landing, in Idaho Falls at 9 AM.

Water District 1 observed storm analysis

October 9 to 13, 2026 | Prepared October 14, 2026

Light precipitation began October 9; most valley rain fell October 10 to 12, while mountain precipitation continued October 13. This recap uses the latest complete daily data; the storm end and later streamflow peaks remain provisional.

Precipitation

Reporting area	Stations included	Average precipitation
Above Blackfoot Valley AgriMet	Ashton, Rexburg, Ririe, Osgood, Shelley, Fort Hall, Aberdeen.	1.25 inches
Below Blackfoot Valley AgriMet	Rupert, Twin Falls near Kimberly.	0.57 inches
Snake River above Heise SNOTEL	Base Camp, Blind Bull Sum, Cottonwood Creek, East Rim Divide, Grand Targhee, Granite Creek, Grassy Lake, Gros Ventre Summit, Gunsight Pass, Lewis Lake Divide, Loomis Park, Phillips Bench, Salt River Summit, Snake River Station, Somsen Ranch, Spring Creek Divide, Thumb Divide, Togwotee Pass, Triple Peak, Two Ocean Plateau, Willow Creek, Younts Peak.	1.93 inches
Henrys Fork Teton SNOTEL	Black Bear, Grand Targhee, Grassy Lake, Island Park, Lewis Lake Divide, Phillips Bench, Pine Creek Pass, White Elephant.	1.50 inches
Willow Blackfoot Portneuf SNOTEL	Oxford Spring, Pebble Creek, Sedgwick Peak, Sheep Mtn., Slug Creek Divide, Somsen Ranch, Wildhorse Divide.	2.16 inches

Equal station means, not area weighted basin or irrigated acreage estimates. Coverage: 7 of 7 and 2 of 2 AgriMet stations; 22 of 22, 8 of 8, and 7 of 7 SNOTEL candidates. Associated SNOTEL groups overlap.

AgriMet totals sum published daily PP. Three 0.01 inch downward gauge fluctuations were retained after cumulative gauge checks. SNOTEL totals use October 14 start of day PREC minus October 9 start of day PREC; minor fluctuations are retained. NRCS uses UTC minus eight hours, so its final endpoint is October 14 at 2 a.m. MDT. October 14 AgriMet daily values are unavailable.

Unregulated streamflow response

Reporting area	Stations included	Average peak increase
Snake River above Heise	Snake River at Flagg Ranch, Pacific Creek, Buffalo Fork, Greys River, Salt River.	107%
Henrys Fork Teton	Fall River above Yellowstone Canal, Teton River above South Leigh Creek.	69%
Willow Blackfoot Portneuf	Willow Creek below Tex Creek, Marsh Creek near McCammon.	92%

Equal mean of station specific peak increases relative to October 6 to 8 mean discharge. Peak window: October 9 at midnight through October 14 at midnight, America/Denver. This is not the change in combined subbasin flow.

Coverage is 5 of 6, 2 of 2, and 2 of 3 gauges. Gros Ventre has seasonal null values. Blackfoot River stops October 11 at 9:45 a.m. MDT and is excluded. Flagg Ranch has 275 of 288 baseline readings and 445 of 480 event readings; its sampled crest has adjacent observations.

Later records were checked through October 14, with included stations ending between 6 and 6:45 a.m. MDT. Salt River reached 471 cfs at 3 a.m., after its 465 cfs table peak; the peak window was not extended. All included USGS data are provisional; current SNOTEL endpoints remain raw and unreviewed.

Sources retrieved October 14: [AgriMet PP](#) | [NRCS PREC](#) | [USGS discharge](#). Method: WD1 Storm Analysis Guide v1.0, September 23, 2026.

Upper Snake River Basin / Water District 1

Weather forecast: October 14 to 20, 2026 | Prepared October 14, 2026

High pressure builds behind the departing low, bringing dry weather and gradual warming. A Pacific trough of low pressure may bring rain and cooler air early next week, with uncertain timing.

Precipitation

- Wednesday through Sunday: Mostly dry across the five reporting areas as high pressure builds.
- Monday night and Tuesday: Rain chances return, favoring mountains; timing and amounts remain uncertain.

Accumulation window: 6 a.m. October 14 through 6 a.m. October 21, Mountain Daylight Time.
Latest available cycle: October 13, issued 8:50 a.m. MDT (14:50 UTC). All amounts are liquid equivalent precipitation.

Reporting area	Forecast locations and station description	Average precipitation	Confidence
Above Blackfoot valley	Ashton, Rexburg BYU Idaho, Ririe, Idaho Falls Airport, Blackfoot 1SE, Fort Hall, and Aberdeen Experiment Station.	0.38 inch	Low to moderate
Below Blackfoot valley	Burley Airport and Twin Falls 6E.	0.19 inch	Low to moderate
Snake River above Heise Mountain/headwater	Base Camp, Blind Bull Summit, Lewis Lake Divide, Phillips Bench, Salt River Summit, Snake River Station, Somsen Ranch, Thumb Divide, Togwotee Pass, and Two Ocean Plateau.	0.58 inch	Low to moderate
Henrys Fork and Teton Mountain/headwater	Black Bear, Island Park, Lewis Lake Divide, Phillips Bench, and White Elephant.	0.68 inch	Low to moderate
Willow, Blackfoot and Portneuf Mountain/headwater	Oxford Spring, Somsen Ranch, and Wildhorse Divide.	0.77 inch	Low to moderate

Amounts are equally weighted averages of seven day forecast totals at the listed locations, not area weighted watershed averages. A displayed 0.00 inch does not guarantee no precipitation.

Temperature

- Wednesday morning: Freeze Warnings cover the upper and lower Snake River Plain and eastern Magic Valley until 9 a.m. MDT, and western Magic Valley until 10 a.m.
- Wednesday and Thursday nights: Idaho Falls 31 to 32°F; Burley 30 to 31°F; Twin Falls 38°F; Jackson 24°F; 9 miles south of Island Park 23 to 24°F.
- Saturday through Tuesday: Near to above average through Monday, then cooler Tuesday. Saturday through Monday night lows: Idaho Falls 36 to 40°F; Burley 37 to 39°F; Twin Falls 42 to 46°F; Jackson 24 to 27°F; Island Park area 26 to 29°F. Tuesday night lows are not yet available.

Wind

- Wednesday: Idaho Falls, west near 6 mph; Jackson, northwest 5 to 8 mph. Burley, west 5 to 10 mph, gusts 18 mph; Twin Falls, southwest to northwest 6 to 11 mph, gusts 21 mph.
- Wednesday night into Thursday: Island Park area north to northeast 5 to 9 mph, gusts 18 to 22 mph. Friday into the weekend: mostly light winds; later wind speeds remain less certain.
